WHOLESALE DISTRIBUTORS OF:
 CONCRETE ACCESSORIES, DRAINAGE PRODUCTS,
 AND BRICK & BLOCK PRODUCTS

Call us for **EXCELLENT Pricing**
 On some **GREAT Blankets!!**

Concrete Curing Blankets: Keep working when the cold temperatures set in and protect the concrete from the "winter" elements that can harm the proper curing.

- Proudly Handmade in the U.S.A.
- 6' x 25', 1/2" Closed-Cell Polyethylene Foam
- R-Value of 3.02 with 3" Air-Space
- 6 Rust-Proof Grommets (4 in each Corner, 3 along Length)
- Double-Stitched and Reinforced Edges
- Plastic Button to hold material in place
- Other Sizes and Types also available

Reinforced Polyfilm: Light weight, heavy-duty string reinforced polyfilm enhances tear-resistance and increases service life. Used for Construction Enclosures, Vapor Retarders, Temporary Walls, and much more.

Accelerators / Icemelts:

- **Calcium Chloride Flake:** Used for Concrete Ready-Mix as an accelerator or as an Icemelt
- **Calcium Chloride Pellets:** For Icemelt. More efficient than ROCK SALT
- **Freezban:** Liquid accelerating admixture for mortar and non-reinforced concrete
- **Freezban Beads:** Dry bead accelerating additive used for mortar and non-reinforced concrete, dissolving faster than powders
- **Freezban NC:** Non-Chloride accelerating admixture for concrete and mortar. Can be used with contact of reinforcing steel or other metal building materials.
